Federal Tax Receipts Are

Short Billion and Half

WASHINGTON.—Federal tax collections in fiscal 1947 fell \$1,563,711,000 below the previous fiscal year because of heavy loss of revenue from the repealed excess profits tax, treasury records showed.

However, the yield from income taxes reached new peaks.

The excess profits tax yield slumped to a comparative trickle of \$1,563,711,000, from \$4,256,310,000 in 1946, but increased collections from income and other taxes helped cushion the effect on Treasury receipts.

Total receipts of the internal revenue bureau from all sources were listed as \$39,108,385,000. From surplus property sales, customs duties and some other sources the government got supplementary receipts that boosted its total budget income to \$43,037,798,000.

Income tax collections, both from individuals and corporations were up sharply to record highs, reflecting booming business and employment.

Individual income tax receipts reached \$19,345,207,000, topping fiscal 1946 by \$638,761,000 although the tax rate was lowered January 1, 1946, midway in the earlier year.

Uncle Sam Says

Millions of my nieces and nephews are increasing their savings by the simple, automatic Payroll Savings Plan. Let's take one example. Suppose you tell your employer that you want to take \$2.35 of your weekly pay in Bonds. In three weeks the accumulation of \$18.75 will buy one \$25 Savings Bond. Merely by holding these bonds to maturity in 10 years you are raising your take-home income \$2.88 every week. It is obvious that the so-called deduction for Savings Bonds is not a deduction but a way for you to store up and increase your earnings for your future use.
